

Personal Inventory System

Stor.Guru is an inventory system to help relieve the stress of not knowing where items are. It helps offload the mental effort of remembering items by tracking the location, names, and other related info in a smart database. Work as a team with other users on your account to keep your items organized and tidy!

Unique QR Code Labels

Stor.Guru uses unique QR codes to identify items. When an item is scanned by a smart phone's camera, Stor.Guru will show your item as it is in the physical world. With Stor.Guru it is easy to keep items in sync and up to date with where they are being stored which unlocks the amazing benefits of adding your items to Stor.Guru!

What's Inside?

This starter pack comes with 2 sheets of unique Stor.guru QR code labels:

- 1.5 inch sq. labels qty. 24
- 0.75 inch sq. labels qty. 108

These labels can be applied to any item you intend to track and digitized into the system!

Easy Searching

Your items are only a quick search away! Search by name, descriptions, or tags. Items are updated in real-time so you always know where your things are after each time they have been used or moved!

What is Stor.guru

Stor.Guru is a Personal Home Inventory web application that uses unique QR Code labels/stickers placed on items and containers. The QR Codes designate items in the app that you can add photos, descriptions and other information such as where they are located or what they have inside.

Stor.Guru has the ability to represent the real world relationships between items. Stor.Guru allows you to nest items inside each other, similar to files and folders on a computer. This illustrates the full location, or path, of the item you are looking for. For example, if you were looking for "Extra Lightbulbs" the path might be "Garage > Metal Shelves > Top Shelf > Spare Parts Bin > Box of new Light Bulbs". By searching for "Light Bulb" in Stor.Guru it is possible to quickly navigate to that item and see the path displayed at the top of the page.

Digitizing your items with Stor.Guru provides benefits to you, your family, co-workers and all of the other users on your account. Everyone can now reference/search Stor.Guru to find what they are looking for rather than asking the one person who might know where it is or who used it last. The mental capacity it takes to remember where items are is now free to be used for more productive things, like tackling the project at hand, rather than just trying to locate the items needed to do the task.

Stor.Guru provides many benefits when your items are digitized in the system. We are only beginning to scratch the surface of what is possible and are excited to create new features that will better help manage the items that you own!

Download & Print

With this label pack you will be able to immediately print Stor.Guru compatible labels, cut them out, and with commonly found tapes (like transparent office or clear shipping tape) affix these QR Code labels to your items.

Printing Settings

- It is okay to print as grayscale.
- Print single-sided only. Not double-sided.
- If printing on precut label stock, it might be helpful to print a test page to ensure labels line up.

Printing Yourself vs. Pre-Printed

Advantages of printing labels yourself:

- Available quickly. No waiting for labels to arrive via mail.
- Takes advantage of common household supplies.
- Environmently friendly when printing only pages with labels.

Advantages of pre-printed labels:

- Adhesive backed and ready to use.
- Waterproof and extremely durable.

- Set zoom or scaling to none or zero. This will allow the labels to be printed in their original size.
- For easiest scanning keep QR Codes as large as possible.
- To save ink or toner, paper and the environment only print the pages with labels on them.

Tips & Tricks

- Cut all of the labels at once and place in a zip reclosable bags.
- The 0.75 inch labels were designed to be used with transparent office tape.
- The 1.5 inch labels were designed to be used with clear shipping tape.
- Carry the labels and tape with you as you organize.
- Always place labels in an obvious location that can easily be scanned.
- On larger a item, multiple labels can be used to make scanning more convenient.

WARNING: PRINT ONLY ONCE! This pack contains unique QR Code labels that are single use only and represent a single item in your inventory. If you need more labels please contact us at info@stor.guru. Printing this pack multiple times will not guarantee QR Code label uniqueness and could lead to the inventory not accurately representing the real world.
